

## ACKNOWLEDGEMENTS

Financial assistance provided by the Coastal Zone Management Act of 1972, as amended, administered by the Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration (NOAA). A publication of the Maryland Coastal Zone Management Program, Department of Natural Resources pursuant to NOAA Award No. NA170Z1124. The views expressed herein are those of the author(s) and do not necessarily reflect the views of NOAA or any of its sub-agencies.

We would like to thank Mary Owens, Roby Hurley, and LeeAnne Chandler with the Critical Area Commission for their dedication, assistance, input and contributions. A special thanks goes out to all those who provided insightful comments and local perspective to help shape the Manual: Stew Comstock (Maryland Department of the Environment), Glen Shaffer (Baltimore County), Bill Stack (Baltimore City), Duncan Stewart (Baltimore City), Stacey Weisner, Bobby Shockley, and Keith Lackie (Worcester County).

### CWP Project Team

Ted Brown – Water Resources Engineer

Tom Schueler – Director of Watershed Research and Practice

Tiffany Wright – Research Assistant

Rebecca Winer – Project Manager

Jennifer Zielinski – Watershed Engineer

An additional thanks goes out to Karen Capiella of the Center for Watershed Protection for her assistance with graphics reproduction.

## TABLE OF CONTENTS

	Page
List of Tables.....	ii
List of Figures.....	iii
Section 1.0 Introduction.....	1-1
Section 2.0 Total Phosphorus as the Keystone Pollutant.....	2-1
Section 3.0 Approach.....	3-1
Section 4.0 Standard Application Process.....	4-1
Section 5.0 Residential Projects.....	5-1
Section 6.0 Stormwater Offsets and Offset Fees.....	6-1
Section 7.0 Frequently Asked Questions.....	7-1
Section 8.0 References and Additional Resources.....	8-1
Appendix A Review of Urban Runoff Pollutants	
Appendix B Selection Criteria for the Keystone Pollutant	
Appendix C Computing Pollutant Load Export	
Appendix D Revision of Phosphorus Concentrations in Stormwater Runoff	
Appendix E Standard Plan: Allowable BMP Options	
Appendix F Residential Water Quality Plan: Allowable BMP Options	
Appendix G Estimating an Offset Fee Based on the Cost of Stormwater Management	

## LIST OF TABLES

Table No.	Title	Page
4.1	Detailed Definitions of Impervious Cover.....	4-3
4.2	Application of Non-Structural BMP Options.....	4-4
4.3	Relationship Between 10% Rule Compliance and the Maryland Stormwater Design Manual Stormwater Credits.....	4-5
4.4	Method for Calculating Predevelopment Phosphorus Loading.....	4-6
4.5	Method for Calculating Post-Development Phosphorus Loading.....	4-7
4.6	Computing Pollutant Removal Requirements.....	4-8
4.7	Estimate of Pollutant Load Removed by Each BMP.....	4-9
4.8	BMP Removal Rates for Total Phosphorus.....	4-9
4.9	Examples of Acceptable Stormwater Offset Projects.....	4-15
4.10	Method for Calculating Post-Development Phosphorus Loading for Off-site Drainage Area.....	4-16
4.11	Off-site Pollutant Load Removed by On-Site BMP.....	4-17
4.12	Total Load Removed by On-Site BMP.....	4-17
5.1	Recommended Techniques for Individual Residential Lots.....	5-2

## LIST OF FIGURES

<b>Figure No.</b>	<b>Title</b>	<b>Page</b>
3.1	10% Rule Application Process.....	3-1
4.1	Standard Application Process.....	4-2
4.2	Existing and Proposed Site Plans for Simple On-Site Compliance Example.....	4-23
4.3	Existing and Proposed Site Plans for Simple On-Site Compliance Example.....	4-29
4.4	Off-site Drainage Area to Proposed On-Site BMP.....	4-35
5.1	Illustrative Example of How Multiple Non-structural Techniques Can be Applied at a Residential Site.....	5-3
7.1	Delineation of Drainage Area Served by the BMP.....	7-3
7.2	Using Drainage Divides to Break-Up the Site into Workable Units.....	7-4
